Hardware Recommendations for use with Delcam Products

Recommended hardware to run Delcam Software:

- Computer with Quad Core or i7 processor
- Windows 7 Professional 64 bit
- DVD Drive
- 8 GB RAM min (12 is better)
- Quadro Nvidia video card (Very important!)
- High resolution monitor (1280 x 1024 minimum)
- Three button Microsoft compatible mouse
- Connection to internet and e-mail recommended for support and updates

The rule of thumb is to get as much power for your systems as you can afford. You can always send us a copy of the systems you are planning to purchase and we can give you advice on that system.

VIDEO:

When purchasing a new computer for your Delcam product, the most important thing is the video card. We recommend getting a Quadro Nvidia card with a minimum of 512 MB of memory. We have seen some issues with GeForce cards. Video cards that we use are:

- NVIDIA Quadro FX-1800
- NVIDIA Quadro FX-880M
- NVIDIA Quadro FX-580
- NVIDIA Quadro 600
- NVIDIA Quadro 2000M
- NVIDIA Quadro 3000M

Make sure you are using up to date drivers from NVIDIA. We have seen several problems that have been fixed with current video drivers from the NVIDIA. The driver version can have a great impact on how the card performs. For more info on various cards, Delcam has been collecting data on video card performance and they have it listed at the following web site.

PROCESSOR:

The processor speed will impact how fast the software will calculate and complete tasks. PowerMill and FeatureCAM are multi-processor aware. In PowerMill, faster processors will calculate a toolpath faster. In PowerShape, it will calculate a complex fillet radius faster and rebuild the solid tree faster. PowerMill and FeatureCAM will utilize it to multi task the toolpath
